

Runway Trailer Kit

Technical Background

The Portable Runway Lighting Kit - BOL is a portable airfield lighting system designed for quick and easy deployment of battery airfield lights. The Runway Lighting Kit is ideal for military, police, airport operators, humanitarian disaster, and medevac situations. The trailer can store 72 lights and comes with an integrated drop-in to charge system, keeping your lights charged in an optimum state and ready for use. A standart 72 light Portable runway kit can deploy up to 3500m of (temporary) runway.

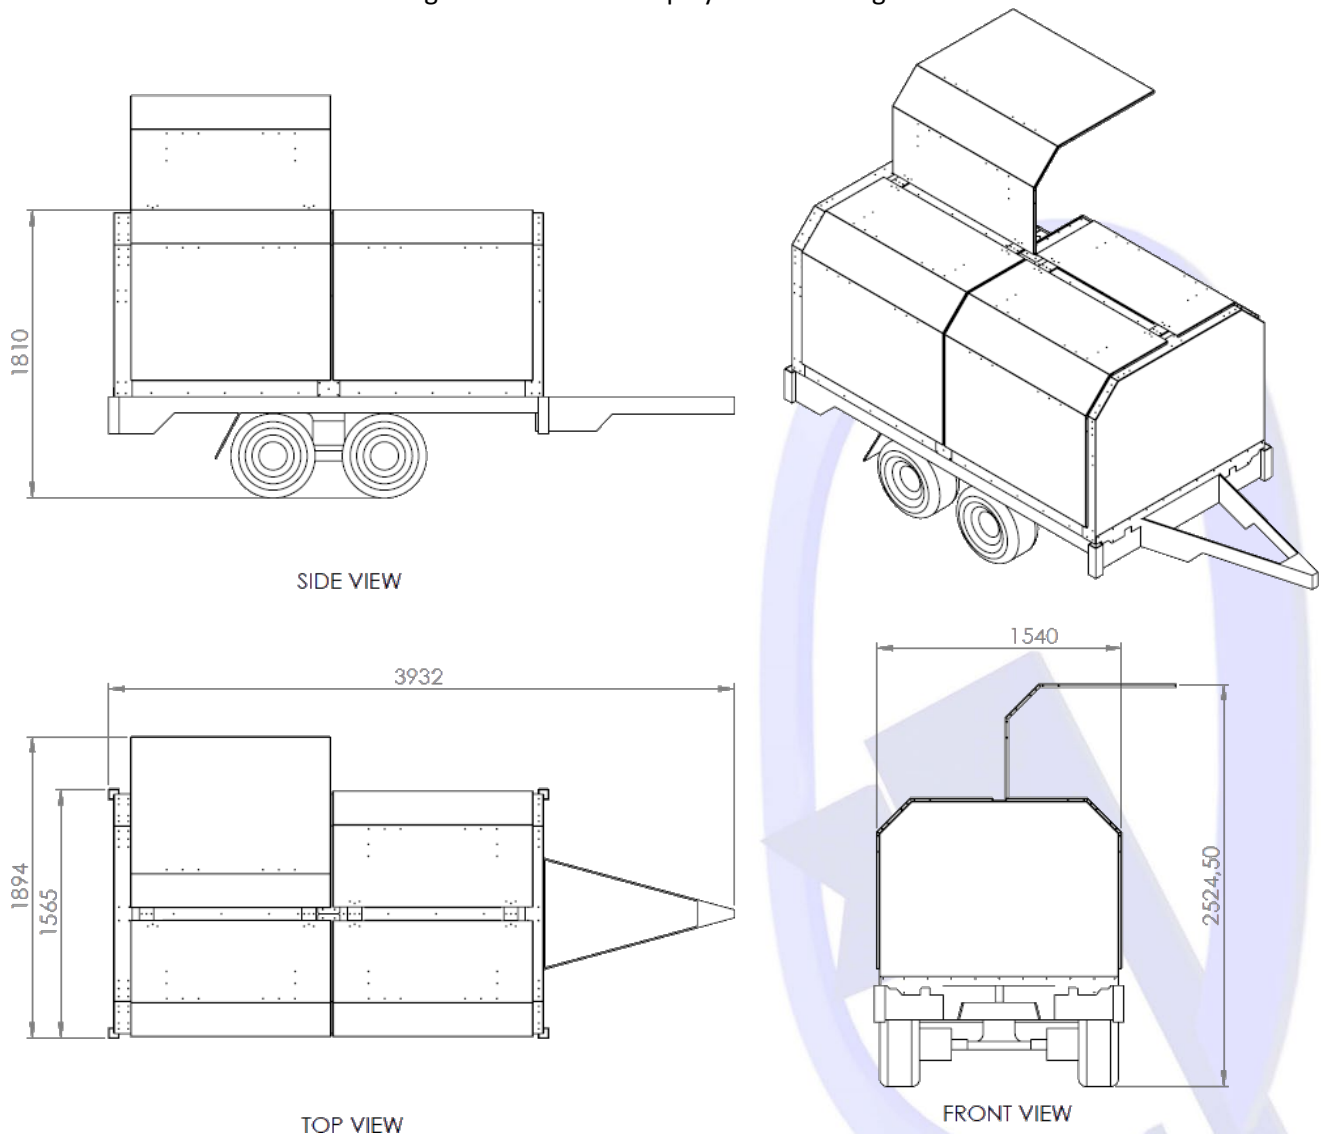

The Portable Runway Lighting Kit comes with 72 portable lights in all requested light colors and applications. The lights can be operated with the built-in remote in the trailer its console, or manually on the portable lights.

The Portable Runway Lighting Kit is self-contained, integrated, and sealed against water IP56. The Portable Runway Lighting Kit is optimized for air-cargo transportation and can be mounted behind any vehicle.
